Import into xLights Option A

- A stand alone FSEQ
- AI voice track as your audio file
- AI MP4 used in the video effect and synched to the audio

Import into xLights Option B

Import into xLights Option B

- The AI voice is embedded into the song file

Import into xLights Option B

- The AI voice is embedded into the song file
- Use text to audio AI to create what you want said as an MP3 file

Import into xLights Option B

- The AI voice is embedded into the song file
- Use text to audio AI to create what you want said as an MP3 file
- Use AI to create your Santa, Elf, Snowman avatar

Import into xLights Option B

The AI voice is embedded into the song file

- Use text to audio AI to create what you want said as an MP3 file
- Use AI to create your Santa, Elf, Snowman avatar
- Use the text to video AI to make the avatar speak creating an MP4 video

Import into xLights Option B

The AI voice is embedded into the song file

- Use text to audio AI to create what you want said as an MP3 file
- Use AI to create your Santa, Elf, Snowman avatar
- Use the text to video AI to make the avatar speak creating an MP4 video
- Embed the AI audio MP3 into the song with your multi track audio editor

Import into xLights Option B

The AI voice is embedded into the song file

- Use text to audio AI to create what you want said as an MP3 file
- Use AI to create your Santa, Elf, Snowman avatar
- Use the text to video AI to make the avatar speak creating an MP4 video
- Embed the AI audio MP3 into the song with your multi track audio editor
- Mix to a new MP3 What does that look like?

Import into xLights Option B

The AI voice is embedded into the song file

- Use text to audio AI to create what you want said as an MP3 file
- Use AI to create your Santa, Elf, Snowman avatar
- Use the text to video AI to make the avatar speak creating an MP4 video
- Embed the AI audio MP3 into the song with your multi track audio editor
- Mix to a new MP3
- **In xLights**
- New sequence

Import into xLights Option B

The AI voice is embedded into the song file

- Use text to audio AI to create what you want said as an MP3 file
- Use AI to create your Santa, Elf, Snowman avatar
- Use the text to video AI to make the avatar speak creating an MP4 video
- Embed the AI audio MP3 into the song with your multi track audio editor
- Mix to a new MP3
- **In xLights**
- New sequence
- Add audio of your song that was mixed with your custom announcement.

Import into xLights Option B

The AI voice is embedded into the song file

- Use text to audio AI to create what you want said as an MP3 file
- Use AI to create your Santa, Elf, Snowman avatar
- Use the text to video AI to make the avatar speak creating an MP4 video
- Embed the AI audio MP3 into the song with your multi track audio editor
- Mix to a new MP3
- **In xLights**
- New sequence
- Add audio of your song that was mixed with your custom announcement.
- On your Matrix / P5 add the video effect and import your avatar MP4

Import into xLights Option B

The AI voice is embedded into the song file

- Use text to audio AI to create what you want said as an MP3 file
- Use AI to create your Santa, Elf, Snowman avatar
- Use the text to video AI to make the avatar speak creating an MP4 video
- Embed the AI audio MP3 into the song with your multi track audio editor
- Mix to a new MP3
- **In xLights**
- New sequence
- Add audio of your song that was mixed with your custom announcement.
- On your Matrix / P5 add the video effect and import your avatar MP4
- Adjust to sync to the audio track

Import into xLights Option B

The AI voice is embedded into the song file

- Use text to audio AI to create what you want said as an MP3 file
